

Magical Solutions

for hair problems...

OPEN HOUSE

for women with thinning hair

180 West Streetsboro Street Tuesday
November 12th from 5 till 8.

My hair doesn't have the volume on top that it used to have. I have a little hair loss on the top and crown of my head but it isn't really noticeable yet.

The solution is easy. A session with our micro points technician will fill in and thicken the area with undetectably small hair extensions called Micro-point links. They are tied into your existing hair with a knot the size of a grain of sand. It causes no stress to your hair but doubles the volume! Micro-point links must be touched up every 5 weeks.

My hair has been thinning for several years and now I can't camouflage it any more.

A Natural Volume hair addition is an easy, comfortable solution. It is undetectable and looks so much like your natural hair that even your closest family or friends won't know (unless you tell them).

My hair is growing out from chemo treatments. Can I get extensions?

You need several inches on hair on top before you have enough to get extensions. A Natural Volume hair piece might a better temporary answer till your hair grows out.

My hair had always been fine and a little thin but now it doesn't seem to grow. I want thicker hair. What can I do?

We customize hair extensions especially for fine thin hair so that your hair doesn't get damaged and there is no danger of anyone seeing the bonds. Your extension hair will move and flow just like naturally thick, healthy hair.

I got my hair cut recently and it is way too short. I want my long, thick hair back.

A "too short" cut can usually be fixed with extensions. A FREE consultation will tell you how much hair you will need to regain your lost length.
