

MASTERS of All Things Hair

Salons everywhere are adding more and more amenities to their menus to expand their realm of personal services. Stylists have to be a “jack of all trades” instead of a master of one. One salon, The Hair Specialists, has remained and solidified the concept of “hair” salon.

“What separates us from other salons is that we focus just on hair. Instead of being centered on fashion trends, we gear our advanced trainings towards the latest technology relating to hair services. We can delve much deeper into the intricacies of the different aspects of hair care than the average salon,” states Lee Hendrickson, who along with Kelly Bartlett, is the co-owner of the Hair Specialists.

“Of course we learn trends, but we use trends to enhance what we do instead of being a prisoner of it.”

“We provide solutions for every hair need,” states Kelly Bartlett, “Not only do we expertly cut and color hair, we have innovative services to treat clients with thinning hair or those with frizzy hair in need of smoothing.”

“Since our inception almost seven years ago we have focused our attention on men and women who have hair problems. From thinning hair, to unruly frizzy hair to damaged hair, we will tackle the problem. And there’s a good chance we will have a solution for you.”

Thin or Fine Hair

“If you were born with it or if your thin hair is a result of stress, illness or environmental issues, our staff has the training and expertise to address the concern. It doesn’t necessarily mean you need hair enhancements; we can make your own hair look thicker and fuller just by cutting it differently”, says Lee, who studied haircutting at the Sassoon Academy in London and now hold regular training sessions for her staff.

“We travel to wherever necessary to acquire the knowledge we need to help our clients. We always want to know the latest science and technology relating to our services” says Kelly,

“Our salon has many different options for all stages of thinning hair. We consult with our clients to see how we can prevent their hair loss from getting worse. There are always things that can be done”

Smoothing and Straightening

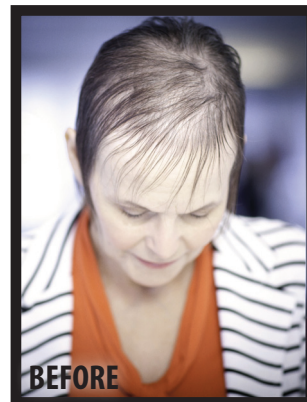

The Hair Specialists is one of only a few salons in Ohio that offers Japanese Thermal Straightening services. This is a method of treating curly hair in a way that smooths and straightens to make it silky smooth and shiny. It is a permanent smoothing that stay straight till the hair grows out. The regrowth needs to be touched up about twice a year.

This phenomenal service tames even the most unruly, curly and frizzy hair into shiny smooth, healthy looking hair.

The entire staff regularly attends advanced classes at a training center in New York City to keep up with the changes and improvements in this service.

“We offer complimentary consultations for all our services so we can share our knowledge by working as partners with our clients” says Kelly, “With so many advanced hair services, we can provide solutions no matter what your personal hair story.” The Hair Specialists offers advanced hair replacement services in a relaxed comfortable salon atmosphere or, if you choose, a private room.
